ACKNOWLEDGEMENT

A sense of gratitude that can be expressed for the valuable help rendered by many people without whom this project would not have been completed. First and foremost, I praise and thank the almighty **GOD** for his blessings that he has bestowed upon me and for giving me strength and support, Throughout the completion of my project work presentation, inspiration and motivation have always played a key role in the success of my venture.

I express my sincere thanks to **DEAN of the college, Dr G. LENIN KUMAR** who encouraged me to attain highest peak and to provide me the opportunity to prepare the project. I am immensely obliged for their help, elevating inspiration, encouraging guidance and kind supervision in the completion of my project.

I wish to convey my sincere thanks to many of the staff at this hospital who lent their valuable guidance and support in helping me to complete my assigned task.

I convey my thanks to my beloved parents and my friends in supporting me and enabling in successfully completing this project.

ABSTRACT

Title of the project": A study on the employees' satisfaction at Dhanalakshmi hospital, Kannur" Kerala

Employee satisfaction or job satisfaction is simply satisfied employees are with their jobs. The term employee satisfaction is used to describe how employees are happy, satisfied and fulfilling their desires and need at work. Employee satisfaction is one key metric that can help determine the overall pulse of an organization, which is why many organizations conduct regular surveys to measure employee satisfaction and track satisfaction trends over time. Therefore, employee satisfaction is one of the important and largely researched and discussed in the area of human resource management. If an organization fails to address both the sides of the equation, they might find they have a complacent team made up of materially satisfied employees who are content to do only what is necessary to remain employed, or a staff of highly engaged employees who are performing well while they look for new opportunities at companies more willing or able to fill their material needs.

Employee satisfaction is typically measured using an employee satisfaction survey. Factors that influence employee satisfaction addressed in these surveys might include compensation, workload, perceptions of management, flexibility, teamwork, resources, etc. These things are all important to companies and organizations who want to keep their employees happy and reduce turnover, but doesn't mean high performance or engagement. HR ideas and strategies focused on how to improve employee satisfaction often times have results that employee satisfaction is only a part of the overall solution. In fact, for some organizations, satisfied employees are people the organization might be better off without. Satisfaction demoralizes high performing employees in the company or organizations.

The purpose of this study is to understand the overall job satisfaction among employees or health care professionals of Dhalakshmi hospital, Kannur. In human resource management the job satisfaction of employees is important to provide and deliver health care services successfully. The purpose of this project is to describe the status of Employees satisfaction and to understand various aspects of employee satisfaction in health sector.

Key words: Employees satisfaction, working environment, health care professionals' health and safety, Employees relationship and Perception

CHAPTER 1

The purpose of this chapter is to provide a general overview of the project and to introduce the reader to the various components of the project. The chapter is divided into two main sections: a description of the project and a description of the project's objectives. The first section describes the project's background, its history, and its current status. The second section describes the project's objectives, its goals, and its expected outcomes.

1.1 PROJECT BACKGROUND

The project was initiated in 1990 by the Department of Education. The project's primary purpose was to develop a new curriculum for the Department's schools. The project was funded by the Department of Education and the Department of Health and Human Services.

The project was designed to be a long-term effort to develop a new curriculum for the Department's schools. The project was designed to be a long-term effort to develop a new curriculum for the Department's schools. The project was designed to be a long-term effort to develop a new curriculum for the Department's schools.

CHAPTER 1

PROJECT PROPOSAL

1.1 PROJECT OBJECTIVES

The purpose of this chapter is to provide a general overview of the project and to introduce the reader to the various components of the project. The chapter is divided into two main sections: a description of the project and a description of the project's objectives. The first section describes the project's background, its history, and its current status. The second section describes the project's objectives, its goals, and its expected outcomes.

PLANNING

Planning is the fundamental management function, which involves deciding beforehand, what is to be done, when is it to be done, how it is to be done and who is going to do it. It is an intellectual process which lays down an organisation's objectives and develops various courses of action, by which the organisation can achieve those objectives. It plans exactly, how to attain a specific goal.

DEFINING ORGANIZATION VISION AND MISSION

Vision- Our vision is to become Kerala's leading health care provider. The important aspect of health care with a human touch is reflected in our motto "Care & Cure with Dedication".

Mission- Provide cost- effective quality medical treatment to all classes of patients through highly trained and qualified doctors with the help of a team of dedicated nursing and paramedical staff using world class facilities and state of the art equipments.

- Keep patients well informed about their medical condition and respect patient's rights.
- Uphold and ensure ethical practice and work as a team while providing health care.
- Respect other systems of medicine and maintain close relationship with all medical colleagues.

SETTING GOALS AND OBJECTIVES

The study is conducted to examine the Employees satisfaction in Dhanalakshmi Hospital, Kannur and also to analyze whether the employees are satisfied with their work along with collecting and analyzing the suggestions from the employees for the current working environment.

1.1 OBJECTIVES

PRIMARY OBJECTIVE

1. To study the employee's satisfaction in Dhanalakshmi hospital Kannur.

SECONDARY OBJECTIVE

1. To understand the socio demographic profile of the employees.
2. To analyze the current satisfaction level of employees in the organization.
3. To study the satisfaction level of employees regarding resources provided by the manager.
4. To study about sufficient opportunities to improve employee's skill.
5. To study the satisfaction level of employees regarding infrastructure of the organization.

NEED FOR THE STUDY

1. Provide good opportunities skills and training of the organization's
2. Employees satisfaction is an important impact on attracting and retaining employees
3. Knowing about the safe and healthy working conditions
4. To identify adequate facilities are there provided by the organization.

SCOPE OF THE STUDY

1. This study focuses on understanding the employee's satisfaction of works in Dhanalakshmi hospital.
2. Collect data from employees.
3. Employees satisfaction assessment provides an understanding above the challengers the employees have faced in relation to the work environment and the factors that leads to poor employees.

LIMITATION

1. The development of an organization is mainly depending on the satisfaction level of the employees at their work. So that they can perform well in the organization.
2. The organization can analyze the level of employee's satisfaction.
3. The organization can improve the working conditions, Environment and other policies to satisfy the employees based on the results of this survey.
4. The study is confined to Dhanalakshmi hospital

ORGANIZING

Organizing is the second key management function, after planning, which coordinates human efforts, arranges resources and incorporates the two in such a way which helps in the achievement of objectives. It involves deciding the ways and means with which the plans can be implemented.

1. FORMULATE ORGANIZATIONAL STRUCTURE

Dhanalakshmi Hospital has a divisional organizational structure. The hospital is segregated into several sections or departments focusing on different product line. Each division is the complete responsibility of the division head and divisional head look after all operations within the department.

2. PROJECT DESIGN

Collection of data is primary important in the research process. Data which is collected for the purpose of research help in proper analysis which is helpful to conduct research effectively. The research is conducted from the responses of the employees through questionnaire. In this research probability sampling method is used for the study.

RESEARCH METHODOLOGY

Research is a careful and detailed study into a specific problem, concern, or issue using the scientific method. It's the adult form of the science fair projects back in elementary school, where you try and learn something by performing an experiment. This is best accomplished by turning the issue into a question, with the intent of the research to answer the question

SOURCE OF DATA

INTERNAL SOURCES

When data is collected from reports and records of the organisation itself, they are known as the internal sources.

EXTERNAL SOURCES

When data is collected from sources outside the organisation, they are known as the external sources.

TYPES OF DATA

PRIMARY DATA

Primary data is the data collected for first time and for the present study. Further, this data is 'pure' in the sense that there haven't been any statistical operations performed on them, plus they are also original. The Census of India is an example of primary data.

SECONDARY DATA

They are the data that are sourced from someplace that has originally collected it. This means that this kind of data has already been collected by some researchers or investigators in the past and is available either in published or unpublished form. This information is impure as statistical operations may have been performed on them already. An example is an information available on the Government of India, the Department of Finance's website or in other repositories, books, journals, etc.

RESEARCH DESIGN

Research design is the foremost step in the methodology adopted and in the undertaken study. It is an overall plan for collection and analysis of data in the research study. Thus, it is an organized, systematic approach to the formulation, implementation and control of the research study. The design of the study is of descriptive in nature. In descriptive research problem is described by using questionnaire or schedule

POPULATION SIZE

Population is set of finite or infinite collection of individuals. It is otherwise called as universe. The total population employees in Dhanalakshmi hospital is 410.

SAMPLING METHOD

In this research simple random sampling method is used for the study.

SAMPLE SIZE

250 respondents have been selected randomly.

DATA TABULATION

MS EXCEL

AREA OF RESEARCH

This research was conducted in Kannur branch.

CHAPTER :2

INDUSTRIAL PROFILE & COMPANY PROFILE

INDUSTRIAL PROFILE

Dhanalakshmi hospital has become one of India's largest sectors - both in terms of revenue and employment. It is a multi-specialty hospital. The founder of Dhanalakshmi hospital is Late Sri. C.M. Ramunni on the year (1900 - 1975). Dhanalakshmi hospital approved as (NABH) National Accreditation Board for Hospital's & Healthcare. Dhanalakshmi hospitals comprises, medical devices, clinical trials, outsourcing, telemedicine, medical tourism, health insurance and medical equipment etc. The Dhanalakshmi hospital healthcare sector is growing due to its strengthening coverage, services and increasing expenditure by public as well as private. Indian healthcare delivery system is categorized into two major components - public and private. The Government, i.e. public healthcare system comprises limited secondary and tertiary care institutions in cities and focuses on providing basic healthcare facilities in the form of primary healthcare centers (PHCs) in rural areas. The private sector provides majority of secondary, tertiary and quaternary care institutions with a major concentration in Dhanalakshmi hospital, tier I and tier II cities. India's competitive advantage lies in its large pool of well-trained medical professionals. The cost of surgery in India Dhanalakshmi hospital is about one tenth of that in the US or Western Europe. India is a land full of opportunities for the medical devices industry. India's Dhanalakshmi hospital is one of the fastest growing sectors and in the coming 10 years it is expected to reach \$275 billion. The country has also become one of the leading destinations for high-end diagnostic services with tremendous capital investment for advanced diagnostic facilities, thus catering to a greater proportion of populations. Besides, Indian populations have become more conscious towards their **Dhanalakshmi hospital as provide motto like "Care and cure with dedication"** up keep. Dhanalakshmi hospital healthcare sector is much diversified and is full of opportunities in every segment.

COMPANY PROFILE

INTRODUCTION

Dhanalakshmi hospital Pvt Ltd is one of the multi-specialty hospitals in Kannur, which provides quality and affordable health care services. Dhanalakshmi Hospital was founded in the memory of the late Sri. C.M. Ramunni, it was the dream of the Sri. C.M. Ramunni to build and run a small general hospital in the weaver's town of Kannur and provide affordable healthcare to the sick and the needy. Dhanalakshmi Hospital Pvt. Ltd. was inaugurated on 30th of October 1998. This ambitious project of Sri. C.M. Ramunni was taken up by his four sons. Now, one of the other Institution of Dhanalakshmi Hospital in the health sector is Dhanalakshmi College of Nursing, which started in the year 2010. Dhanalakshmi hospital Pvt Ltd is a 350 bedded multi-specialty hospital, within Kannur and there is a name to reckon neighboring regions departments and a great exceptional team of doctors who provide holistic and quality health care services. The motto of the hospital is "Care and Cure with dedication" The vision of the organisation is to become Kerala's leading Health Care Provider. Dhanalakshmi Hospital Pvt. Ltd has set it on benchmark for excellence and quality in health care. The hospital has been recognized by NABH National Accreditation Board for Hospitals and Health Care Providers, which is governed by Quality Council of India. NABH accreditation is a mark of excellence in health care which provides access to reliable and certified information on facilities, infrastructure and levels of care. Dhanalakshmi Hospitals is a healthcare powerhouse you can trust with your life. Their highly qualified panel of doctors, nursing-paramedics personnel with multi-specialty and super specialty health services offer you the very best medical care. At Dhanalakshmi Hospitals, they unite exceptional clinical success rates and superior technology with a passion to excel in everything they do.

FOUNDER OF AN ORGANIZATION

Late Sri. C.M. Ramunni (1900 - 1975)

It was the dream of the founder to build and run a small general hospital in the 'weavers' town' Cannanore to provide affordable healthcare.

Dhanalakshmi Hospital was founded in the memory of the late Sri. C.M. Ramunni (1900 – 1975) the pioneering Textile industrialist and philanthropist of Cannanore (Kannur). It was the dream of the founder to build and run a small general hospital in the 'weavers' town' Cannanore to provide affordable healthcare to the sick and needy in the area.

is dream was realized in 1998 with the inauguration of Dhanalakshmi Hospital Pvt. Ltd. a modern multi-specialty hospital with proposed bed strength of 350. This ambitious project was taken up by his four sons two of who are well known specialist doctors. The founder's eldest son Sri C.M. Bharathan (Industrialist) was the first chairman of the Hospital and his younger brother Sri C.M. Valsraj (Businessman) was the director, his third son Dr. C.M. Dhananjayan (Ophthalmologist) was the Managing Director and his youngest son Dr. C.M. Ramesh (Dermatologist) was the Medical Director. After the demise of Sri. C.M. Bharathan in 2010, Sri C.M. Valsraj took his place as the Chairman of the hospital and Mrs. Nalini Bharathan was later taken in as Director.

MESSAGE FROM ORGANIZATION

It was the dream of our beloved father, the late Sri C.M. Ramunni , founder of Dhanalakshmi Group of companies. He was a highly respected pioneering handloom textile industrialist and philanthropist of Cannanore who realized the importance of modern healthcare in the backward region of North Malabar. When two of his sons qualified as doctors this dream even became bigger. A large plot of land was procured in the heart of Cannanore town where the hospital was intended to be built. However, his dreams bore fruit only after his demise when his sons took up the mission, got the hospital constructed and dedicated it in his memory. The first phase of the hospital building was completed in mid-1998 and handed over to the newly formed company, Dhanalakshmi Hospitals Pvt. Ltd. The official inauguration of the hospital was on 30th October 1998. To start with we had only 50 beds which soon was increased to 100 beds and planned to have 350 bed capacities within three years.

Dhanalakshmi Hospital now has outpatient and inpatient facilities to cater to all economic sections of patients. We have fully automated modern clinical laboratories, Imaging services with state of the art equipments, Well equipped Coronary Care unit, medical pediatric and surgical ICU's, Emergency Medicine Services, Modern and well equipped Operation theaters and labor rooms besides a level 3 NICU and step-down ICU with highly trained staff and a modern Renal dialysis unit. The hospital has its own Blood storage facilities and has separate inpatient and outpatient pharmacies with 24 hours service. The emergency department runs round the clock and is supported with reliable ambulance services.

Besides the existing general specialties, several more specialties and super specialties were added as more and more highly qualified specialist doctors joined our panel of doctors. Within a short period, the hospital has started to make a name for itself. The management soon realized the importance of '**quality health care**' and started the process of getting the hospital National Accreditation. In March 2014 after a sincere work and effort, **Dhanalakshmi Hospital secured the prestigious NABH Accreditation, and became the 12th hospital in Kerala and the only one in North Malabar to be nationally accredited. With NABH Accreditation Dhanalakshmi Hospital ensures our patients "quality health care "with priority to patient safety at all times.** Established treatment protocols and policies form the basis of the service provided by our panel of highly competent and qualified doctors, nursing and paramedical staff. NABH Accreditation also empowers our patients and continuous quality improvement is ensured.

Affiliated to Dhanalakshmi Hospital are our two Nursing Institutions, Dhanalakshmi College of Nursing affiliated to the Karala Health University and Dhanalakshmi School of Nursing, affiliated to Kerala Nursing council. Both courses have the recognition of the Kerala Nursing Council and the Indian Nursing Council. Dhanalakshmi College of Nursing conducts two-degree courses: the 4-year B.Sc. Nursing and the condensed 2 year Post Basic B.Sc. Nursing course (for GNM candidates) and the School of Nursing conducts the 3 Year GNM Diploma course. Hundreds of Nurses have qualified from our two institutions so far. The Nursing Institutions have always maintained excellent examination results which itself speaks highly of the excellent teaching and training being imparted by experienced and well qualified teaching faculty.

The hospital with its modern building and excellent infrastructure is situated in the heart of the city, yet it is easily accessible. The premises are abundant in greenery and a lot of importance is given to the protection of the environment. We strive to make our patients stay in the hospital a pleasant and comfortable one and have given utmost importance in providing quality healthcare.

MOTTO

"Care & Cure with Dedication."

SPECIALITIES PROVIDED BY DHANALAKSHMI HOSPITAL

Anesthesiology

Our team of well-skilled and well-experienced anesthesiologists aims to provide optimum quality of patient care not only in the operation theatres but also beyond it, by optimizing preoperative patient status and providing comprehensive patient care during the early post operative period.

Cardiology

The Department of Cardiology at Dhanalakshmi Multi-Specialty Hospital provides comprehensive evaluation, consultation, and medical management of diseases of the heart and circulatory system. A With the latest technology, skilled physicians and

compassionate staff, the hospital provides care for abnormalities of cardiac rhythm and conduction, coronary artery disease, cardiomyopathies, heart failure and valvular heart disease. A full range of invasive modalities are available. Leading edge techniques and technology to, ensure the safest, most effective treatment modalities are chosen.

Day Care Centre

Our Day-Care is just adjacent to the peri-operative suites and it caters to all medical and surgical procedures. It is equipped to handle and ensure safe and friendly environment for patients. The Day-Care centre is manned by a team of highly skilled and experienced nurses.

Dentistry

Healthy teeth not only add to the beauty of ones smile and charm, they also play a significant role in enhancing the persons self-image or personality. At Dhanalakshmi Multi-Specialty Hospital, your health and comfort are our primary concern. You will find our dedicated staff improving your dental and oral health through expert and sympathetic care. Our Dental department assures the highest standard of Dentistry, following the strictest norms of cleanliness and sterilization, with the support of an experienced staff & trained personnel, whose chief aim is to create an everlasting smile on your face.

Dermatology And Venerology

Our Dermatology departments care for both common and rare problems of skin, hair, nails and mucous membranes. Supported by a panel of experienced Dermatologists, Dhanalakshmi Multi-Specialty Hospital has been providing relief to a number of patients with complex skin ailments.

ENT

Complete Care for Ear, Nose and Throat. ENT physicians are doctors who specialize in medical and surgical management and treatment of patients with problems of the ear, nose, throat, and related structures of the head and neck. Dhanalakshmi Multi-Specialty Hospital offers comprehensive treatment and care for all kinds of ENT ailments. A Throat problems (like Pharyngitis, flu, streptococcal sore throat) Ear problems(like infections, ear wax, tinnitus, inner ear disease causing vertigo), Nose problems(like sinusitis, allergic rhinitis, nose bleed) Specialists at the hospital provide medicinal as well as

surgical solutions to problems ranging from hearing loss and sleeping disorders to sinusitis, vertigo and voice impairments.

Gastroenterology

The gastroenterology and hepatology department at Dhanalakshmi Multi Specialty Hospital provides a comprehensive service for the full spectrum of gastrointestinal and liver problems. Our aim is to provide high quality gastroenterology care to the local population. Emerging technologies allow early diagnosis of cancer, increasing the potential for cure. In advanced cancers, there are many therapeutic options which can improve quality of life. Non-malignant conditions of the gastrointestinal tract often affect young people and can be very debilitating. Our aim is to diagnose and manage these conditions while striving to maintain normal life and work patterns for our patients.

General surgery

General surgery is the surgical specialty at Dhanalakshmi Hospital that focuses on the abdomen. Our surgeons who practice general surgery are highly skilled and typically operate on common abdominal complaints including appendicitis, hernias, gallbladder surgeries, stomach and intestinal surgeries. Areas of surgical treatment include stomach, small bowel, colon, liver, pancreas, gallbladder, bile ducts, and often the thyroid gland. They also deal with diseases involving the skin, breast, soft tissue and hernias. The General surgeons are able to deal initially with almost any surgical emergency. Often, they are the first port of call to critically ill or gravely injured patients, and are required to perform a variety of procedures to stabilize such patients, such as intubation, burr hole, cricothyroidotomy, and emergency laparotomy or thoracotomy to stop bleeding.

General medicine

The General Medicine dept. at Dhanalakshmi Multi Specialty Hospital provides the quality diagnosis, prevention and treatment of advanced diseases. Our Physicians are qualified to deal with a host of problems a patient presents with no matter how simple or complex they may be.

The department provides specialized services in the following fields:

Thyroid Problems

Kidney & Liver Diseases

Gastro Intestinal Diseases

Diabetes Mellitus, Hypertension, Hyperlipidemias, Bronchial Asthma & other lung diseases.

Respiratory, Urinary & Other Infections

Chronic Headaches, Migraine & other neurological diseases

Anemia

Convulsions, syncopal attacks & other medical emergencies

Sepsis with multiorgan failure

HIV / AIDS, Tuberculosis and other infections

Preventive Healthcare Check-up Packages

Gynecology and Obstetrics

Obstetrics and Gynecology department at Dhanalakshmi Hospital provides comprehensive treatment modalities for women, all ages of life. A We provide maternity services for normal and high-risk pregnancies and family planning services, Â infertility screening and treatments and both Laparoscopic and Conventional gynecological Surgeries along with medical therapies. We have a backup of a well-equipped NICU with advanced life support systems. Besides routine obstetric care for complicated pregnancies specialized care is provided for high-risk cases.

Laser Proctology

laser is inherently therapeutic, sealing off tiny blood vessels. With the closing of tiny blood vessels, The proctologist is able to operate in a controlled and bloodless environment. Common conditions treated with laser proctology include hemorrhoids, fissures, fistula, pilonidal sinus, and polyps. Under LA/GA/SA, laser energy is delivered by the fiber directly to the abnormalities in anal area and they will obliterate from inside and this will help to preserve mucosa and sphincter structure to an extremely high precision. Laser energy is used to close off the blood supply nourishing the abnormal growth which results immediate shrinkage effect.

Maxillofacial Surgery

Oral and Maxillofacial Surgery is a branch of surgery to correct a wide spectrum of diseases, injuries and defects in the head, neck, face, jaws and the hard and soft tissues of the oral and maxillofacial region.

Neonatal ICU

Dhanalakshmi Neonatal ICU is a level 3 NICU, which takes care of babies from 2 weeks of gestation and ≥ 500 gms with full time neonatologist availability. We have 16 ICU Bed and 12 Step-down beds. Facilities for non-invasive ventilation and Invasive ventilation which includes high frequency oscillatory ventilation are available.

Nephrology

Faculty in the Division of Nephrology are devoted to diagnosing, treating, and managing disorders affecting the kidney and urinary tract, including acute and chronic kidney failure, high blood pressure, inherited kidney diseases, kidney stones, urinary tract infections, and abnormalities in the urine such as blood and protein. We also evaluate and treat problems with growth and development that are specifically related to chronic kidney disease.

Neurology

The brain makes us who we are, largely defining our uniqueness as individuals and as a species. For this reason, diseases that attack the nervous system, whether suddenly as in stroke, insidiously as in Alzheimer's disease, or with recurrent attacks as may occur in multiple sclerosis - strike at the core of our being. Imagine being unable to speak, being unable to move your limbs at will, or experiencing difficulty recognizing common surroundings or close relatives. Dhanalakshmi Multi Specialty Hospital's neurologists are leading the quest to better understand, treat and prevent neurological conditions in children, adolescents and adults. Our physicians offer outstanding neurological clinical care for patients of all ages for a wide range of neurological conditions, disorders and diseases.

Ophthalmology

The department of Ophthalmology at Dhanalakshmi Multi Specialty Hospital is designed to provide comprehensive eye care under one roof. The department functions as distinct sub-specialty services so that patients have access to consultations from all of our ophthalmic specialists. They are dedicated to providing outstanding, compassionate patient care. Because the physicians work in close. The hospital features state-of-the-art diagnostic equipment (housed in the Ocular Imaging Center and in the Ophthalmic Electrodiagnostic Laboratory) and offers the most advanced therapies available. The hospital offers diagnosis and medical and surgical treatments for cornea and external ocular diseases, glaucoma and retinal diseases/disorders. Our team also has experts in pediatric ophthalmology, neuro-ophthalmology and reconstructive surgery, orbital surgery, and low vision optometric and rehabilitative care.

Orthopedics

Orthopedic focuses on injuries and diseases of your musculoskeletal system. This complex system includes your bones, joints, ligaments, tendons, muscles, and nerves and allows you to move, work, and be active. Dhanalakshmi Multi Specialty Hospital is the major elective Orthopedic facility in North Malabar. The department offers a comprehensive service for elective orthopedic surgery offering a range of simple and complex inpatient and day care procedures including:

- A Primary and revision hip replacement
- A Primary and revision knee replacement
- A Arthroscopies (key-hole surgery for joints)
- A Ligament reconstruction in the knee
- A Tumor resection and restoration

Pediatrics and Neonatology

The pediatric department provides care for children from birth to 15 years of age, for all illnesses. The department consists of the general pediatric wards, neonatal intensive care unit (NICU), neonatal phototherapy Unit and pediatric outpatients. The division attempts to provide a medical home concept in the care of children. This model provides

primary preventive pediatric care which addresses areas of well-baby check-ups, immunizations, developmental assessments, nutritional assessments, healthy life style and proper physical activities.

Plastic and Micro Vascular Surgery

Plastic surgery is harmonious blend of medical science & art. To transfer the tissue and maintain the viability is applied science. To shape that tissue in to graceful anatomic form is artistry. The term Plastique was derived from the Greek word Plastikos meaning fit for moulding. Basic principle in Reconstructive surgery is restore, repair and remake those parts which nature has given but fortune has taken away.

Urology

Welcome to the Department of Urology of Dhanalakshmi Multi Specialty Hospital. We are proud to offer comprehensive diagnostic and treatment options for a wide range of adult and pediatric urological conditions, such as urinary incontinence, prostate and kidney cancers, kidney stones, male infertility and kidney dysfunction. Every member of our team is a respected leader in their field of expertise, combining excellent credentials and experience with superb clinical skills. A team approach is adopted for difficult problems, which includes the expertise of radiology, pathology, medical oncology, and radiation oncology.

Dhanalaksmi Hospital has set its own benchmark for excellence and quality in health care for more than two decades. The hospital always try to keep itself abreast of the technological advancements the field of medical science. With its 350 beds, state-of-the-art infrastructure and highly reputed and skilled medical professionals, Dhanalakshmi hospital has been a trailblazer in the health care scenario in Malabar. In March 2014 recognition of its commendable service to the humanity the hospital is all set to get the prestigious accreditation from the **National Accreditation Board for Hospitals and Health Care**

Providers (NABH) which is governed by the **Quality Council of India**, a part of the **Department of Industry and Commerce, Government of India**.

NABH accreditation is a mark of excellence in health care, which provides access to reliable and certified information on facilities, infrastructure and levels of care.

This certification will motivate us to scale further heights and rededicate to our motto "**Cure & Care with Dedication** "

ORGANIZATIONAL STRUCTURE

CHAPTER:3

REVIEW OF LITERATURE

CHAPTER:3

REVIEW OF LITERATURE

Saklani, D.R., (1979) India the sample comprised respondents of both managerial and nonmanagerial categories drawn from 24 organizations of different types. Apart from monetary considerations, employees in India accord a high value to the factors that satisfy self-esteem and self-actualization needs of a higher order.

Hackman (1980) identified that the work environment that is able to fulfill employees' personal needs is considered to provide a positive interaction effect, which will lead to and excellent employees.

Partridge (1981) studied the employees job satisfaction level of women in Britain in which he found that the job satisfaction level of women was more as compared with black men, as they normally have low expectations from their jobs.

Beumont (1982) in his article highlights the employees job satisfaction level of general household in employees where there is a close fit relationship employer and employees in an organization. In the study he found that there is a positive relationship between employees Job Satisfaction.

Savery (1989) highlighted the job satisfaction level of the employees was mainly due to interesting and challenging work which was followed by a feeling of achievement wherein, he even said salary was ranked as a very low satisfier. Organizations should always focus on satisfying the three basic needs (Individual motivators, Employee relationships and personal relationships) of an employee.

Melvin (1993) stated that the environmental design of an organization plays a very important role in employees' satisfaction at the same time it also plays an important role in employees high job involvement. A good environmental design of an organization helps in resolving the conflicts and confusion.

According to Cavry (1995) Organizational features such as policies and procedures, leadership style, operations, and general contextual factors of setting, all have a profound effect on how staff views the quality of work life environment that is able to fulfill employees' personal needs is considered to provide a positive interaction effect, which will lead to an excellent employee.

MacDermid (1999) studied the job satisfaction level of employees. He said there are six variables of workaholic patterns i.e., Workaholics, Enthusiastic Workaholics, Work Enthusiastic, Unengaged Workers, Relaxed Workers and Disenchanted Workers. The job satisfaction level and career employee's satisfaction level were much more in Enthusiastic.

According to Winter et al. (2000) employees for academicians as an attitudinal response to the prevailing work environment and posited five work environment domains that include role stress, job characteristics, supervisory, structural and sectoral characteristics to directly and indirectly shape academicians' experiences, attitudes and behaviour.

Lau et al. (2001) explained employees' satisfaction as the favorable working environment that supports and promotes satisfaction by providing employees with rewards, job security and career growth opportunities.

Harter (2002), selected 7,939 business units in 36 organizations for the sample of the study on employee's satisfaction sentiments and employee engagement. The study examined aggregated employee job satisfaction sentiments and employee engagement.

Saari & Judge (2004) discussed on employee attitudes leading to job satisfaction. The employee attitude is related to the job, when a person has a liking towards to the job of the employee's satisfaction level increases there by increasing the organization performance as a whole.

Keshtkaran A. (2005) investigated the faculty members' satisfaction with various components of their academic career, such as nature of work salary, promotion, relations with the managers and colleagues. Study results revealed the highest and the second highest level of satisfaction with the nature of their work and their colleagues respectively. Analysis of data revealed a statistically significant linear relationship between age.

Zaki (2003) explains the employees job satisfaction and performance of Lebanese banking non-managerial staff. The researcher found a significant relationship between employee's job satisfaction and gender in relation to pay and supervision.

Raduan CheRose (2006) The result indicates that three exogenous variables are significant: career satisfaction, career achievement and career balance, with 63% of the variance of employees

Austin (2007) mentions "Self-fulfillment", "Independence" and "Job environment" are the key reasons to managers' job satisfaction in Cyprus. Good pay, highly skilled subordinates, growth opportunities relate to self-fulfillment. Employers should focus on these three factors i.e., the demographic variables (age, gender, number of years in the organization, public or private sector,

Hawley (2008) discusses on the beginning teachers' employees job satisfaction level and factors influencing their level of satisfaction. Teachers are found to be satisfied with their job and the factors which lead to their employees job satisfaction were academic.

Peltier J., & Dahl A (2009) This research study was consisted of two components. An advice-giving committee was establishing that participated in an online forum about

the quality of service, motivation, satisfaction and show of employee. Quantitative analysis was conducted to match employee satisfaction data with patient satisfaction data to assess the relationship between employee satisfaction and patient experiences.

Artz (2010) studies the link between Fringe benefits and employees job satisfaction. Fringe benefits always don't lead to employee's job satisfaction. It is always acceptable to an extent where in the employee has a feeling that he is able to satisfy his needs

Mudor and Tookson (2011) discusses about the link between human resource management practices, in employees job satisfaction and finally the turnover. Supervision, training and pay practices these are the three variables in HRM Practices by employees.

Al-Zoubi (2012) studies the relationship between employer and employee's satisfaction of various private and public organizations and Salary. He found that salary is not a prime factor that influences job satisfaction. Though financial effect is fast but has very sort effect. Employees Job satisfaction is always a long-term requirement by an organization.

Gurusamy & Mahendran (2013), in their study found that Salary occupies the First Rank for determining employees job satisfaction compared with other major determinants. The study was conducted on 300 respondents in an organization.

Rashid Saeed et al., (2014), in his study found promotion, pay, fairness and working condition to be the key factors that contribute to employee job satisfaction. The study was conducted on 200 telecom sector employees. It was concluded that money and compensation play an important role in the job satisfaction of the telecom employees.

Neeraj Kumari (2016) pursued observational research on behavior and criteria in the service sector against employee's job satisfaction. The research is done with a certain framework and observations into the life insurance scheme. Throughout the analysis of employees, it is found that life insurance employees are usually satisfied.

Crispen Chipunza, Bulelwa Malo (2017) concluded that an optimistic view for the employees on the organization's community, successful relationships with co-workers, supervisors' encouragement. Participants are fairly pleased with job prospects, and the wages were not satisfactory. Finally, the connection between the atmosphere of the company and satisfaction at the job is important

CHAPTER 4
DATA ANALYSIS AND INTERPRITATION

LEADING

Leading involves influencing others towards attainment of objectives

- The data is collected using structured questionnaire with the sample size of 25 employees working in Dhanalakshmi hospital, Kannur.
- The research has used primary data for collection of information as it is first hand and original information it is more relevant and reliable.

- Questions were listed, arranged orderly and respondents were told about the purpose of collecting the information.
- Simple random sampling was used to collect the data. So that employees participating in this research randomly.
- From the primary data collected, Data analysis and interpretation was done the support of MS EXCEL.

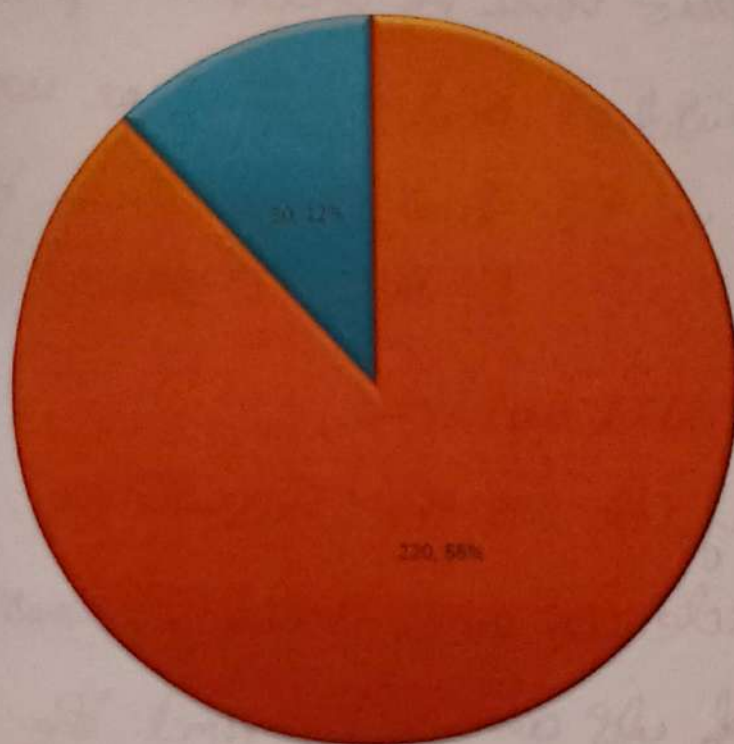

PROFILE OF THE RESPONDENTS

I. RESPONSE TOWARDS GENDER

TABLE NO-1

GENDER

CATEGORY	NO OF RESPONSE	PERCENTAGE
FEMALE	220	88%
MALE	30	12%
TOTAL	250	100%

■ FEMALE ■ MALE

INTERPRETATION

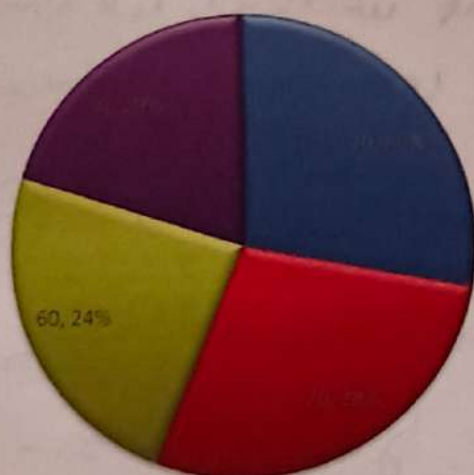

As table shows the 88 percent of the respondents are female 12 percent of the respondents are male.

2. RESPONSE TOWARDS AGE

TABLE N O-2

AGE OF RESPONDENTS

CATEGORY	NO OF RESPONSE	PERCENTAGE
20-30	70	28%
30-40	70	28%
40-50	60	24%
ABOVE 50	50	20%
TOTAL	250	100%

■ 20-30 ■ 30-40 ■ 40-50 ■ ABOVE 50

INTERPRETATION

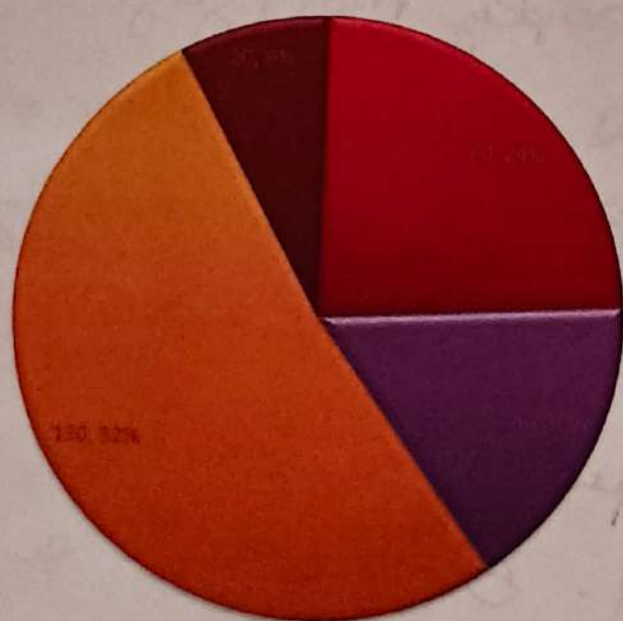

As the table shows 28 percent of the respondents are 20-30 years same way this table shows 28 percent of the respondents are 30-40 years 28 percent of the respondents are 40-50 years 24 percent of the respondents and above 50, 20 percent of employees having at least lowest age.

3. RESPONSE TOWARDS EDUCATIONAL LEVEL

TABLE NO-3

EDUCATIONAL LEVEL

CATEGORY	NO OF RESPONSE	PERCENTAGE
SSLC	60	24%
PLUS TWO	40	16%
DEGREE	130	52%
OTHERS	20	8%
TOTAL	250	100%

■ SSLC ■ PLUS TWO ■ DEGREE ■ OTHERS

INTERPRETATION

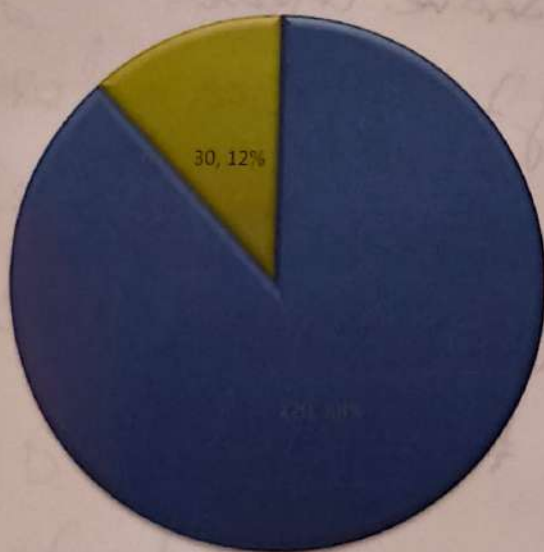

As the table shows the 52 percent of the respondents are degree, 24 percent of the respondents in SSLC, 16 percent of the respondents in PLUS TWO and 8 percent of the respondents are others above qualification.

4. RESPONSE TOWARDS MARTIAL STATUS

TABLE NO-4

MARTIAL STATUS

CATAGORY	NO OF RESPONSES	PERCENTAGE
MARRIED	220	88%
NOT MARRIED	30	12%
TOTAL	250	100%

■ MARRIED ■ NOT MARRIED

INTERPRETATION

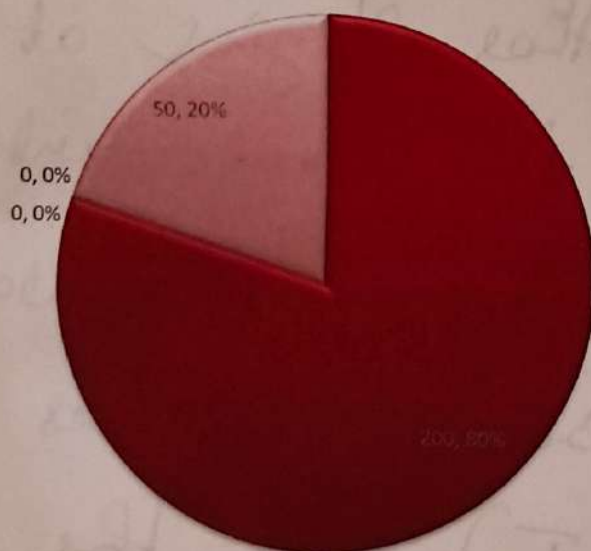

In this table shows the 88 percent of the respondents are married and 12 percent of the reponden ts are not married.

5. RESPONSE TOWARDS ANNUAL INCOME

TABLE NO-5

ANNUAL INCOME

CATEGORY	NO OF RESPONSE	PERCENTAGE
BELOW 20000	200	80%
20000-30000	0	0%
30000-40000	0	0%
ABOVE 40000	50	20%
TOTAL	250	100%

■ BELOW 20000 ■ 20000-30000
 ■ 30000-40000 ■ ABOVE 40000

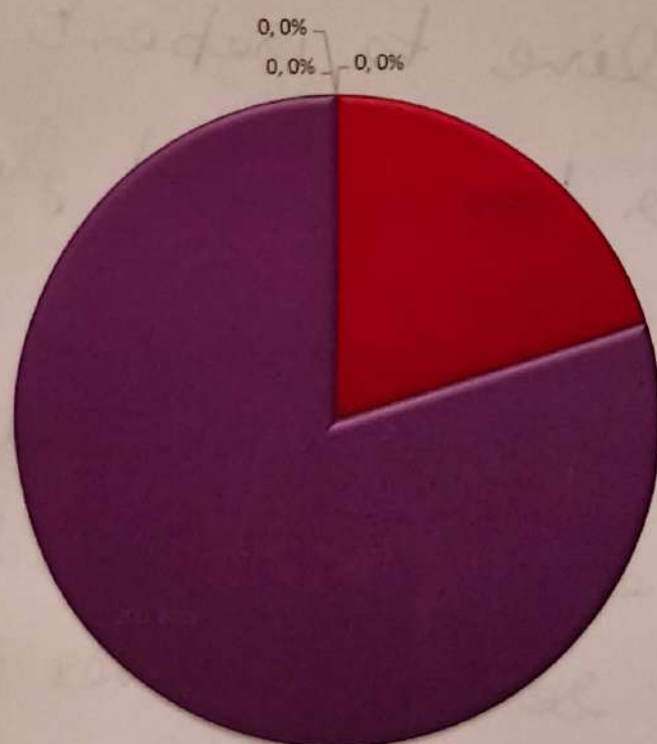

INTERPRETATION

In this table shows 20 percent of the respondents of annual income is above 40000. And 80 percent of employees are annual income below 20000.

A study of employees satisfaction at Dhanalakshmi hospital Kannur, Kerala

1.Are you satisfied with your organization?

CATEGORY	NO OF RESPONSE	PERCENTAGE
HIGHLY SATISFIED	50	20%

CONCLUSION

The purpose of this study was to determine the effect of the use of a computer program on the learning of the English language. The study was conducted in a classroom setting where the students were given a series of lessons on the use of the computer program. The results of the study showed that the students who used the computer program showed a significant improvement in their learning of the English language compared to the students who did not use the computer program. This suggests that the use of a computer program can be an effective tool for teaching the English language.

CHAPTER 6

CONCLUSION

The purpose of this study was to determine the effect of the use of a computer program on the learning of the English language. The study was conducted in a classroom setting where the students were given a series of lessons on the use of the computer program. The results of the study showed that the students who used the computer program showed a significant improvement in their learning of the English language compared to the students who did not use the computer program. This suggests that the use of a computer program can be an effective tool for teaching the English language.

CONCLUSION

Employee satisfaction is one key metric that can help determine the overall health of an organization, which is why many organizations employ regular surveys to measure employee satisfaction and track satisfaction trends over time. A high satisfaction level indicates that employees are happy with how their employer treats them. In this research I understand that majority of the employees in a hospital are female and three of them are male working in an hospital so that this study comprise that employees satisfaction is an important feature of organizations. Dhanalakshmi Hospital needs to ensure that the employees morale are far above the ground in the work surroundings they are entrusted. High work pleasure among the employees is a requirement for increasing is a part of their work and quality of infrastructure provided by the organisation.

The positive performance of employees in the organisation is an outcome of their suitable job experience. It represents that there is a significant association between job satisfaction of employees and relationship behavior factors, Pay and compensation factors and training and career growth factors in the perspective of employees in Dhanalakshmi Hospital. The correlation results indicate that the most significant component in the employees work satisfaction is the pay and compensation factor. The study exploring the factors influencing the employee's satisfaction of staff analyses the important aspects of employees motivating factor.
